### Overview

Mabelle recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Mabelle's learning preferences, teachers can help him achieve greater success in school.

Age-based scores are not reported for Mabelle. His date of birth may not have been recorded properly or may be out of range for the test level he was administered.

# PROFILE NARRATIVE FOR BRAIDEN TROVATO

## Cognitive Abilities Test™ (CogAT®)

Class: WINDER  
Building: Longitudinal Bldg  
System: Training System  
State: DM

Student: Trovato, Braiden  
Student ID: 94731 0004

Nonverbal	38	38	0	1	1	4	25
<b>Composite (VQN)</b>				<b>1</b>	<b>1</b>	<b>4</b>	<b>25</b>

Notes:

Lila's ability profile is 1A. Visit [www.cogat.com](http://www.cogat.com) for more detailed information on profile 1A. Click on the "Interactive Profile Interpretation System" button. Enter 1A in the "Input Your Score Profile" section. Click "Search".

### Overview

Lila recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Lila's learning preferences, teachers can help him achieve greater success in school.

### Lila's Profile of Test Scores

Lila's scores on the three batteries do not differ significantly. All three of his scores are somewhat below average. Students who show this profile can learn effectively but often need guidance. The following steps may help Lila learn more readily in school:

- Whenever possible, build on Lila's interests and accomplishments.
- Reduce the number of things Lila must attend to, remember, or do when solving problems.
- When attempting new tasks, provide Lila with structure in the form of specific directions and guidance.
- When working in groups, pair Lila with other students who can model the desired skills.

### More Information on Lila's Scores

The sections to the left explain Lila's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 5.2 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 1.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 1.

Each of these sections includes one or more scores. The Stanine reports Lila's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Lila.

# PROFILE NARRATIVE FOR ALEXANDER SCHNEIDER

Please contact your child's teacher if you need assistance with score interpretation.

## Overview

Andrew recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Andrew's learning preferences, teachers can help him achieve greater success in school.

## Andrew's Profile of Test Scores

Andrew's scores on the three batteries do not differ significantly. All three of his scores are in the very high range. The following recommendations may help Andrew excel in school:

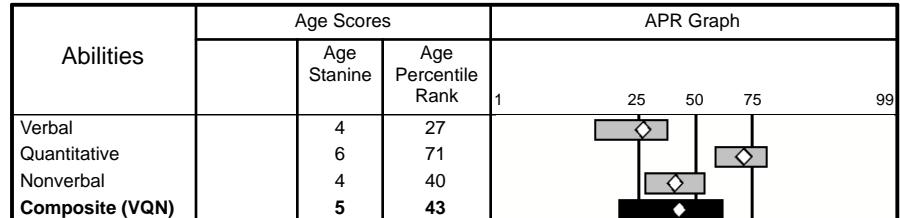

- Andrew's single greatest need is for academic challenge at the level of his abilities and achievements.
- Encourage the development of Andrew's academic skills. Working with an older and more experienced student or adult can be especially productive.
- Andrew will benefit most from discovery learning with other students who model new ways of understanding a problem, challenge Andrew's current thinking, and offer a diversity of perspectives.
- Develop Andrew's understanding of how adults try to distinguish between facts and opinions when evaluating arguments.

## More Information on Andrew's Scores

The sections to the left explain Andrew's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 5.1 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 1.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 1.

Each of these sections includes one or more scores. The Stanine reports Andrew's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Andrew.

Abilities	Raw Scores			Grade Scores		Local Scores

Nonverbal	38	19	19	2	6	5	56
<b>Composite (VQN)</b>				<b>1</b>	<b>3</b>	<b>5</b>	<b>56</b>

Notes:

Haley's ability profile is 4B (Q+). Visit [www.cogat.com](http://www.cogat.com) for more detailed information on profile 4B (Q+). Click on the "Interactive Profile Interpretation System" button. Enter 4B (Q+) in the "Input Your Score Profile" section. Click "Search".

## Overview

Haley recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Haley's learning preferences, teachers can help her achieve greater success in school.

## Haley's Profile of Test Scores

Haley's overall performance is in the average range, and her Quantitative Battery score is higher than the scores on the other batteries. She has a relative strength in quantitative (mathematical) reasoning. Whenever a student shows a particular cognitive strength, the goals for classroom instruction are

- to encourage the continued development of the strength
- to use the strength to enhance the student's development in other areas.

For example, a strength in understanding mathematical rules often indicates a similar strength in understanding rules in computer programming and sometimes in language usage as well. Discovering and then learning rules and strategies can help Haley develop in other areas.

## More Information on Haley's Scores

The sections to the left explain Haley's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 5.5 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 1.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 1.

Each of these sections includes one or more scores. The Stanine reports Haley's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Haley.

# PROFILE NARRATIVE FOR LYNSEY Woomer

## Cognitive Abilities Test™ (CogAT®)

Class: WYNN  
 Building: Longitudinal Bldg  
 System: Training System  
 State: DM

Student: Woomer, Lynsey  
 Student ID: 9473161108  
 Form-Level: 7-7  
 Test Date: 08/2012  
 Norms: Fall 2011  
 Grade: 1

Abilities	Age Scores			APR Graph				
		Age Stanine	Age Percentile Rank	1	25	50	75	99
Verbal		9	99					◇

Nonverbal	44	44	44	9	99	7	81
<b>Composite (VQN)</b>				<b>9</b>	<b>99</b>	<b>7</b>	<b>81</b>

Notes:

Lynsey's ability profile is 9A. Visit [www.cogat.com](http://www.cogat.com) for more detailed information on profile 9A. Click on the "Interactive Profile Interpretation System" button. Enter 9A in the "Input Your Score Profile" section. Click "Search".

### Overview

Lynsey recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Lynsey's learning preferences, teachers can help him achieve greater success in school.

### Lynsey's Profile of Test Scores

Lynsey's scores on the three batteries do not differ significantly. All three of his scores are in the very high range. The following recommendations may help Lynsey excel in school:

- Lynsey's single greatest need is for academic challenge at the level of his abilities and achievements.
- Encourage the development of Lynsey's academic skills. Working with an older and more experienced student or adult can be especially productive.
- Lynsey will benefit most from discovery learning with other students who model new ways of understanding a problem, challenge Lynsey's current thinking, and offer a diversity of perspectives.
- Develop Lynsey's understanding of how adults try to distinguish between facts and opinions when evaluating arguments.

### More Information on Lynsey's Scores

The sections to the left explain Lynsey's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 5.1 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 1.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 1.

Each of these sections includes one or more scores. The Stanine reports Lynsey's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Lynsey.

# PROFILE NARRATIVE FOR ALEXANDE WRIGHT

## Cognitive Abilities Test™ (CogAT®)

Class: WYNN

### Overview

Alexande recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Alexande's learning preferences, teachers can help her achieve greater success in school.

### Alexande's Profile of Test Scores

Alexande's scores on the three batteries do not differ significantly. All three of her scores are somewhat below average. Students who show this profile can learn effectively but often need guidance. The following steps may help Alexande learn more readily in school:

- Whenever possible, build on Alexande's interests and accomplishments.
- Reduce the number of things Alexande must attend to, remember, or do when solving problems.
- When attempting new tasks, provide Alexande with structure in the form of specific directions and guidance.
- When working in groups, pair Alexande with other students who can model the desired skills.

### More Information on Alexande's Scores

The sections to the left explain Alexande's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 5.7 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 1.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 1.

Each of these sections includes one or more scores. The Stanine reports Alexande's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Alexande.

# PROFILE NARRATIVE FOR NATHAN ZAVSZA

Notes:

Madison's ability profile is 7B (Q+). Visit [www.cogat.com](http://www.cogat.com) for more detailed information on profile 7B (Q+). Click on the "Interactive Profile Interpretation System" button. Enter 7B (Q+) in the "Input Your Score Profile" section. Click "Search".

## Overview

Madison recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Madison's learning preferences, teachers can help her achieve greater success in school.

## Madison's Profile of Test Scores

Madison's overall performance is in the above average range, and her Quantitative Battery score is higher than the scores on the other batteries. She has a relative strength in quantitative (mathematical) reasoning. Whenever a student shows a particular cognitive strength, the goals for classroom instruction are

- to encourage the continued development of the strength
- to use the strength to enhance the student's development in other areas.

For example, a strength in understanding mathematical rules often indicates a similar strength in understanding rules in computer programming and sometimes in language usage as well. Discovering and then learning rules and strategies can help Madison develop in other areas.

## More Information on Madison's Scores

The sections to the left explain Madison's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 5.9 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 2.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 2.

Each of these sections includes one or more scores. The Stanine reports Madison's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Madison.

Notes:

Thomas' ability profile is 7B (Q+). Visit [www.cogat.com](http://www.cogat.com) for more detailed information on profile 7B (Q+). Click on the "Interactive Profile Interpretation System" button. Enter 7B (Q+) in the "Input Your Score Profile" section. Click "Search".

## Overview

Thomas recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Thomas' learning preferences, teachers can help him achieve greater success in school.

## Thomas' Profile of Test Scores

Thomas' overall performance is in the above average range, and his Quantitative Battery score is higher than the scores on the other batteries. He has a relative strength in quantitative (mathematical) reasoning. Whenever a student shows a particular cognitive strength, the goals for classroom instruction are

- to encourage the continued development of the strength
- to use the strength to enhance the student's development in other areas.

For example, a strength in understanding mathematical rules often indicates a similar strength in understanding rules in computer programming and sometimes in language usage as well. Discovering and then learning rules and strategies can help Thomas develop in other areas.

## More Information on Thomas' Scores

The sections to the left explain Thomas' performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 5.9 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 2.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 2.

Each of these sections includes one or more scores. The Stanine reports Thomas' performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Thomas.

### Overview

Kenneth recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Kenneth's learning preferences, teachers can help him achieve greater success in school.

### Kenneth's Profile of Test Scores

Kenneth's scores on the three batteries do not differ significantly. All three of his scores are in the very high range. The following recommendations may help Kenneth excel in school:

- Kenneth's single greatest need is for academic challenge at the level of his abilities and achievements.
- Encourage the development of Kenneth's academic skills. Working with an older and more experienced student or adult can be especially productive.
- Kenneth will benefit most from discovery learning with other students who model new ways of understanding a problem, challenge Kenneth's current thinking, and offer a diversity of perspectives.
- Develop Kenneth's understanding of how adults try to distinguish between facts and opinions when evaluating arguments.

### More Information on Kenneth's Scores

The sections to the left explain Kenneth's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 5.0 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 2.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 2.

Each of these sections includes one or more scores. The Stanine reports Kenneth's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Kenneth.

### Overview

Steven recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Steven's learning preferences, teachers can help him achieve greater success in school.

### Steven's Profile of Test Scores

Steven's scores on the three batteries do not differ significantly. All three of his scores are somewhat below average. Students who show this profile can learn effectively but often need guidance. The following steps may help Steven learn more readily in school:

- Whenever possible, build on Steven's interests and accomplishments.
- Reduce the number of things Steven must attend to, remember, or do when solving problems.
- When attempting new tasks, provide Steven with structure in the form of specific directions and guidance.
- When working in groups, pair Steven with other students who can model the desired skills.

### More Information on Steven's Scores

The sections to the left explain Steven's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 6.3 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 2.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 2.

Each of these sections includes one or more scores. The Stanine reports Steven's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Steven.

Notes:

Sidney's ability profile is 9A. Visit [www.cogat.com](http://www.cogat.com) for more detailed information on profile 9A. Click on the "Interactive Profile Interpretation System" button. Enter 9A in the "Input Your Score Profile" section. Click "Search".

### Overview

Sidney recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Sidney's learning preferences, teachers can help him achieve greater success in school.

### Sidney's Profile of Test Scores

Sidney's scores on the three batteries do not differ significantly. All three of his scores are in the very high range. The following recommendations may help Sidney excel in school:

- Sidney's single greatest need is for academic challenge at the level of his abilities and achievements.
- Encourage the development of Sidney's academic skills. Working with an older and more experienced student or adult can be especially productive.
- Sidney will benefit most from discovery learning with other students who model new ways of understanding a problem, challenge Sidney's current thinking, and offer a diversity of perspectives.
- Develop Sidney's understanding of how adults try to distinguish between facts and opinions when evaluating arguments.

### More Information on Sidney's Scores

The sections to the left explain Sidney's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 6.1 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 2.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 2.

Each of these sections includes one or more scores. The Stanine reports Sidney's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Sidney.

## Overview

Candace recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Candace's learning preferences, teachers can help him achieve greater success in school.

## Candace's Profile of Test Scores

Candace's scores on the three batteries do not differ significantly. All three of his scores are in the range typically observed in students of this age. For students who have reasoning scores in the average range, the following steps may be helpful:

- Build on Candace's strengths by encouraging academic accomplishments in areas that interest him.
- Point out how new skills and information build on knowledge and skills Candace already has.
- Show Candace how to break complex tasks into simpler steps. Model the steps as you explain them. Write the steps on a sheet of paper and let Candace work with a partner to follow them.
- Teach Candace study skills such as planning use of time, formulating questions to guide study, and taking notes.

## More Information on Candace's Scores

The sections to the left explain Candace's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 6.10 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 3.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 3.

Each of these sections includes one or more scores. The Stanine reports Candace's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Candace.

Angelina's ability profile is 7B (Q+). Visit [www.cogat.com](http://www.cogat.com) for more detailed information on profile 7B (Q+). Click on the "Interactive Profile Interpretation System" button. Enter 7B (Q+) in the "Input Your Score Profile" section. Click "Search".

## Overview

Angelina recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Angelina's learning preferences, teachers can help her achieve greater success in school.

## Angelina's Profile of Test Scores

Angelina's overall performance is in the above average range, and her Quantitative Battery score is higher than the scores on the other batteries. She has a relative strength in quantitative (mathematical) reasoning. Whenever a student shows a particular cognitive strength, the goals for classroom instruction are

- to encourage the continued development of the strength
- to use the strength to enhance the student's development in other areas.

For example, a strength in understanding mathematical rules often indicates a similar strength in understanding rules in computer programming and sometimes in language usage as well. Discovering and then learning rules and strategies can help Angelina develop in other areas.

## More Information on Angelina's Scores

The sections to the left explain Angelina's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 5.8 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 3.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 3.

Each of these sections includes one or more scores. The Stanine reports Angelina's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Angelina.

- Whenever possible, build on Joseph's interests and accomplishments.
- Reduce the number of things Joseph must attend to, remember, or do when solving problems.
- When attempting new tasks, provide Joseph with structure in the form of specific directions and guidance.
- When working in groups, pair Joseph with other students who can model the desired skills.

## More Information on Joseph's Scores

The sections to the left explain Joseph's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 7.2 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 3.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 3.

Each of these sections includes one or more scores. The Stanine reports Joseph's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Joseph.

# PROFILE NARRATIVE FOR VANESSA KERN

Please contact your child's teacher if you need assistance with score interpretation.

### Overview

Vanessa recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Vanessa's learning preferences, teachers can help her achieve greater success in school.

### Vanessa's Profile of Test Scores

Vanessa's scores on the three batteries do not differ significantly. All three of her scores are in the very high range. The following recommendations may help Vanessa excel in school:

- Vanessa's single greatest need is for academic challenge at the level of her abilities and achievements.
- Encourage the development of Vanessa's academic skills. Working with an older and more experienced student or adult can be especially productive.
- Vanessa will benefit most from discovery learning with other students who model new ways of understanding a problem, challenge Vanessa's current thinking, and offer a diversity of perspectives.
- Develop Vanessa's understanding of how adults try to distinguish between facts and opinions when evaluating arguments.

### More Information on Vanessa's Scores

The sections to the left explain Vanessa's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 7.1 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 3.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 3.

Each of these sections includes one or more scores. The Stanine reports Vanessa's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Vanessa.

# PROFILE NARRATIVE FOR CATHRYN KIMMONS

Notes:

Gabriel's ability profile is 5B (Q+). Visit [www.cogat.com](http://www.cogat.com) for more detailed information on profile 5B (Q+). Click on the "Interactive Profile Interpretation System" button. Enter 5B (Q+) in the "Input Your Score Profile" section. Click "Search".

## Overview

Gabriel recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Gabriel's learning preferences, teachers can help him achieve greater success in school.

## Gabriel's Profile of Test Scores

Gabriel's overall performance is in the average range, and his Quantitative Battery score is higher than the scores on the other batteries. He has a relative strength in quantitative (mathematical) reasoning. Whenever a student shows a particular cognitive strength, the goals for classroom instruction are

- to encourage the continued development of the strength
- to use the strength to enhance the student's development in other areas.

For example, a strength in understanding mathematical rules often indicates a similar strength in understanding rules in computer programming and sometimes in language usage as well. Discovering and then learning rules and strategies can help Gabriel develop in other areas.

## More Information on Gabriel's Scores

The sections to the left explain Gabriel's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 7.5 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 3.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 3.

Each of these sections includes one or more scores. The Stanine reports Gabriel's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Gabriel.

Notes:

### Overview

Marissa recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Marissa's learning preferences, teachers can help him achieve greater success in school.

### More Information on Marissa's Scores

The sections to the left explain Marissa's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 6.1 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 4.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 4.

Each of these sections includes one or more scores. The Stanine reports Marissa's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Marissa.

## Overview

Joseph recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Joseph's learning preferences, teachers can help him achieve greater success in school.

## Joseph's Profile of Test Scores

Joseph's scores on the three batteries do not differ significantly. All three of his scores are in the very high range. The following recommendations may help Joseph excel in school:

- Joseph's single greatest need is for academic challenge at the level of his abilities and achievements.
- Encourage the development of Joseph's academic skills. Working with an older and more experienced student or adult can be especially productive.
- Joseph will benefit most from discovery learning with other students who model new ways of understanding a problem, challenge Joseph's current thinking, and offer a diversity of perspectives.
- Develop Joseph's understanding of how adults try to distinguish between facts and opinions when evaluating arguments.

## More Information on Joseph's Scores

The sections to the left explain Joseph's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 6.7 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 4.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 4.

Each of these sections includes one or more scores. The Stanine reports Joseph's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Joseph.

### Overview

John recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing John's learning preferences, teachers can help him/her achieve greater success in school.

### John's Profile of Test Scores

John's scores on the three batteries do not differ significantly. All three of his/her scores are somewhat below average. Students who show this profile can learn effectively but often need guidance. The following steps may help John learn more readily in school:

- Whenever possible, build on John's interests and accomplishments.
- Reduce the number of things John must attend to, remember, or do when solving problems.
- When attempting new tasks, provide John with structure in the form of specific directions and guidance.
- When working in groups, pair John with other students who can model the desired skills.

### More Information on John's Scores

The sections to the left explain John's performance using different types of comparisons and score scales.

- The Age Scores section compares his/her performance to students across the nation who are also 6.5 years old.
- The Grade Scores section compares his/her performance to students across the nation who are also in grade 4.
- The Local Scores section compares his/her age score performance to students in your local area who are also in grade 4.

Each of these sections includes one or more scores. The Stanine reports John's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by John.

Notes:

Ray's ability profile is 6B (Q+). Visit [www.cogat.com](http://www.cogat.com) for more detailed information on profile 6B (Q+). Click on the "Interactive Profile Interpretation System" button. Enter 6B (Q+) in the "Input Your Score Profile" section. Click "Search".

## Overview

Ray recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Ray's learning preferences, teachers can help him achieve greater success in school.

## Ray's Profile of Test Scores

Ray's overall performance is in the average range, and his Quantitative Battery score is higher than the scores on the other batteries. He has a relative strength in quantitative (mathematical) reasoning. Whenever a student shows a particular cognitive strength, the goals for classroom instruction are

- to encourage the continued development of the strength
- to use the strength to enhance the student's development in other areas.

For example, a strength in understanding mathematical rules often indicates a similar strength in understanding rules in computer programming and sometimes in language usage as well. Discovering and then learning rules and strategies can help Ray develop in other areas.

## More Information on Ray's Scores

The sections to the left explain Ray's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 7.6 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 4.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 4.

Each of these sections includes one or more scores. The Stanine reports Ray's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Ray.

## Overview

Gabriel recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Gabriel's learning preferences, teachers can help him achieve greater success in school.

## Gabriel's Profile of Test Scores

Gabriel's scores on the three batteries do not differ significantly. All three of his scores are in the above-average range. Students with above-average reasoning scores learn relatively quickly. The following recommendations may help Gabriel achieve in school:

- Encourage Gabriel to discover concepts and principles rather than always providing answers. Projects that develop the student's interests can be particularly effective.
- Challenge Gabriel with materials, projects, and problems that are more difficult than those used for the typical student.
- Expose Gabriel to different learning or problem-solving strategies to help him understand their value for different tasks.
- When working in groups, permit Gabriel to learn by explaining information, helping to summarize, and modeling higher-order thinking skills.

## More Information on Gabriel's Scores

The sections to the left explain Gabriel's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 5.10 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 4.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 4.

Each of these sections includes one or more scores. The Stanine reports Gabriel's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Gabriel.

### Overview

Walter recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Walter's learning preferences, teachers can help her achieve greater success in school.

### Walter's Profile of Test Scores

Walter's scores on the three batteries do not differ significantly. All three of her scores are in the very high range. The following recommendations may help Walter excel in school:

- Walter's single greatest need is for academic challenge at the level of her abilities and achievements.
- Encourage the development of Walter's academic skills. Working with an older and more experienced student or adult can be especially productive.
- Walter will benefit most from discovery learning with other students who model new ways of understanding a problem, challenge Walter's current thinking, and offer a diversity of perspectives.
- Develop Walter's understanding of how adults try to distinguish between facts and opinions when evaluating arguments.

### More Information on Walter's Scores

The sections to the left explain Walter's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 6.1 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 4.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 4.

Each of these sections includes one or more scores. The Stanine reports Walter's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Walter.

# PROFILE NARRATIVE FOR LAYTON NEWCOMER

## Cognitive Abilities Test™ (CogAT®)

Class: MRS DILLON  
 Building: Longitudinal Bldg  
 System: Training System  
 State: DM

Student: Newcomer, Layton  
 Student ID: 120184  
 Form-Level: 7-10  
 Test Date: 08/2012  
 Norms: Fall 2011  
 Grade: 4

Abilities	Age Scores			APR Graph				
		Age Stanine	Age Percentile Rank	1	25	50	75	99
Verbal		1	1	◇				
Quantitative		1	1	◇				
Nonverbal		1	1	◇

Notes:

Layton's ability profile is 1A. Visit [www.cogat.com](http://www.cogat.com) for more detailed information on profile 1A. Click on the "Interactive Profile Interpretation System" button. Enter 1A in the "Input Your Score Profile" section. Click "Search".

### Overview

Layton recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Layton's learning preferences, teachers can help him achieve greater success in school.

### Layton's Profile of Test Scores

Layton's scores on the three batteries do not differ significantly. All three of his scores are somewhat below average. Students who show this profile can learn effectively but often need guidance. The following steps may help Layton learn more readily in school:

- Whenever possible, build on Layton's interests and accomplishments.
- Reduce the number of things Layton must attend to, remember, or do when solving problems.
- When attempting new tasks, provide Layton with structure in the form of specific directions and guidance.
- When working in groups, pair Layton with other students who can model the desired skills.

### More Information on Layton's Scores

The sections to the left explain Layton's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 5.10 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 4.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 4.

Each of these sections includes one or more scores. The Stanine reports Layton's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Layton.

<b>Composite (VQN)</b>				<b>3</b>	<b>15</b>	<b>4</b>	<b>33</b>

Notes:

Emilia's ability profile is 6B (Q+). Visit [www.cogat.com](http://www.cogat.com) for more detailed information on profile 6B (Q+). Click on the "Interactive Profile Interpretation System" button. Enter 6B (Q+) in the "Input Your Score Profile" section. Click "Search".

## Overview

Emilia recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Emilia's learning preferences, teachers can help her achieve greater success in school.

## Emilia's Profile of Test Scores

Emilia's overall performance is in the average range, and her Quantitative Battery score is higher than the scores on the other batteries. She has a relative strength in quantitative (mathematical) reasoning. Whenever a student shows a particular cognitive strength, the goals for classroom instruction are

- to encourage the continued development of the strength
- to use the strength to enhance the student's development in other areas.

For example, a strength in understanding mathematical rules often indicates a similar strength in understanding rules in computer programming and sometimes in language usage as well. Discovering and then learning rules and strategies can help Emilia develop in other areas.

## More Information on Emilia's Scores

The sections to the left explain Emilia's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 7.5 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 4.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 4.

Each of these sections includes one or more scores. The Stanine reports Emilia's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Emilia.

## Overview

Christia recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Christia's learning preferences, teachers can help her achieve greater success in school.

## Christia's Profile of Test Scores

Christia's scores on the three batteries do not differ significantly. All three of her scores are in the very high range. The following recommendations may help Christia excel in school:

- Christia's single greatest need is for academic challenge at the level of her abilities and achievements.
- Encourage the development of Christia's academic skills. Working with an older and more experienced student or adult can be especially productive.
- Christia will benefit most from discovery learning with other students who model new ways of understanding a problem, challenge Christia's current thinking, and offer a diversity of perspectives.
- Develop Christia's understanding of how adults try to distinguish between facts and opinions when evaluating arguments.

## More Information on Christia's Scores

The sections to the left explain Christia's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 6.2 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 4.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 4.

Each of these sections includes one or more scores. The Stanine reports Christia's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Christia.

Notes:

Nina's ability profile is 8A. Visit [www.cogat.com](http://www.cogat.com) for more detailed information on profile 8A. Click on the "Interactive Profile Interpretation System" button. Enter 8A in the "Input Your Score Profile" section. Click "Search".

## Overview

Nina recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Nina's learning preferences, teachers can help him/her achieve greater success in school.

## Nina's Profile of Test Scores

Nina's scores on the three batteries do not differ significantly. All three of his/her scores are in the above-average range. Students with above-average reasoning scores learn relatively quickly. The following recommendations may help Nina achieve in school:

- Encourage Nina to discover concepts and principles rather than always providing answers. Projects that develop the student's interests can be particularly effective.
- Challenge Nina with materials, projects, and problems that are more difficult than those used for the typical student.
- Expose Nina to different learning or problem-solving strategies to help him/her understand their value for different tasks.
- When working in groups, permit Nina to learn by explaining information, helping to summarize, and modeling higher-order thinking skills.

## More Information on Nina's Scores

The sections to the left explain Nina's performance using different types of comparisons and score scales.

- The Age Scores section compares his/her performance to students across the nation who are also 6.2 years old.
- The Grade Scores section compares his/her performance to students across the nation who are also in grade 4.
- The Local Scores section compares his/her age score performance to students in your local area who are also in grade 4.

Each of these sections includes one or more scores. The Stanine reports Nina's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Nina.

<b>Composite (VQN)</b>				<b>1</b>	<b>1</b>	<b>2</b>	<b>9</b>

Notes:

Davarria's ability profile is 1A. Visit [www.cogat.com](http://www.cogat.com) for more detailed information on profile 1A. Click on the "Interactive Profile Interpretation System" button. Enter 1A in the "Input Your Score Profile" section. Click "Search".

Number Att. = Number Attempted

Please contact your child's teacher if you need assistance with score interpretation.

### Overview

Davarria recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Davaria's learning preferences, teachers can help him achieve greater success in school.

### Davarria's Profile of Test Scores

Davarria's scores on the three batteries do not differ significantly. All three of his scores are somewhat below average. Students who show this profile can learn effectively but often need guidance. The following steps may help Davaria learn more readily in school:

- Whenever possible, build on Davaria's interests and accomplishments.
- Reduce the number of things Davaria must attend to, remember, or do when solving problems.
- When attempting new tasks, provide Davaria with structure in the form of specific directions and guidance.
- When working in groups, pair Davaria with other students who can model the desired skills.

### More Information on Davaria's Scores

The sections to the left explain Davaria's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 7.9 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 5.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 5.

Each of these sections includes one or more scores. The Stanine reports Davaria's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Davaria.

# PROFILE NARRATIVE FOR LANDEN GARNER

### Overview

Vernasia recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Vernasia's learning preferences, teachers can help her achieve greater success in school.

### Vernasia's Profile of Test Scores

Vernasia's scores on the three batteries do not differ significantly. All three of her scores are in the very high range. The following recommendations may help Vernasia excel in school:

- Vernasia's single greatest need is for academic challenge at the level of her abilities and achievements.
- Encourage the development of Vernasia's academic skills. Working with an older and more experienced student or adult can be especially productive.
- Vernasia will benefit most from discovery learning with other students who model new ways of understanding a problem, challenge Vernasia's current thinking, and offer a diversity of perspectives.
- Develop Vernasia's understanding of how adults try to distinguish between facts and opinions when evaluating arguments.

### More Information on Vernasia's Scores

The sections to the left explain Vernasia's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 8.7 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 5.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 5.

Each of these sections includes one or more scores. The Stanine reports Vernasia's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Vernasia.

Please contact your child's teacher if you need assistance with score interpretation.

### Overview

Brandon recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Brandon's learning preferences, teachers can help him achieve greater success in school.

### Brandon's Profile of Test Scores

Brandon's scores on the three batteries do not differ significantly. All three of his scores are in the range typically observed in students of this age. For students who have reasoning scores in the average range, the following steps may be helpful:

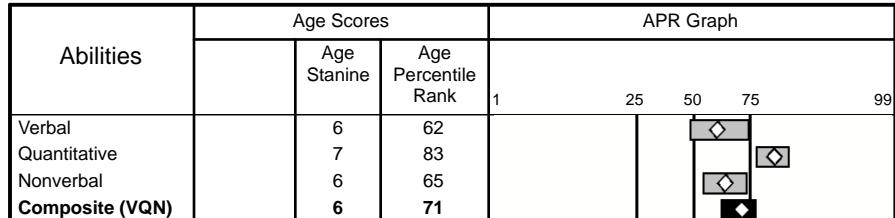

- Build on Brandon's strengths by encouraging academic accomplishments in areas that interest him.
- Point out how new skills and information build on knowledge and skills Brandon already has.
- Show Brandon how to break complex tasks into simpler steps. Model the steps as you explain them. Write the steps on a sheet of paper and let Brandon work with a partner to follow them.
- Teach Brandon study skills such as planning use of time, formulating questions to guide study, and taking notes.

### More Information on Brandon's Scores

The sections to the left explain Brandon's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 8.10 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 5.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 5.

Each of these sections includes one or more scores. The Stanine reports Brandon's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Brandon.

Number Att. = Number Attempted

Please contact your child's teacher if you need assistance with score interpretation.

### Overview

Rayden recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Rayden's learning preferences, teachers can help him achieve greater success in school.

### Rayden's Profile of Test Scores

Rayden's scores on the three batteries do not differ significantly. All three of his scores are in the very high range. The following recommendations may help Rayden excel in school:

- Rayden's single greatest need is for academic challenge at the level of his abilities and achievements.
- Encourage the development of Rayden's academic skills. Working with an older and more experienced student or adult can be especially productive.
- Rayden will benefit most from discovery learning with other students who model new ways of understanding a problem, challenge Rayden's current thinking, and offer a diversity of perspectives.
- Develop Rayden's understanding of how adults try to distinguish between facts and opinions when evaluating arguments.

### More Information on Rayden's Scores

The sections to the left explain Rayden's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 8.10 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 5.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 5.

Each of these sections includes one or more scores. The Stanine reports Rayden's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Rayden.

## Overview

Beatriz recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Beatriz's learning preferences, teachers can help her achieve greater success in school.

## Beatriz's Profile of Test Scores

Beatriz's scores on the three batteries do not differ significantly. All three of her scores are in the range typically observed in students of this age. For students who have reasoning scores in the average range, the following steps may be helpful:

- Build on Beatriz's strengths by encouraging academic accomplishments in areas that interest her.
- Point out how new skills and information build on knowledge and skills Beatriz already has.
- Show Beatriz how to break complex tasks into simpler steps. Model the steps as you explain them. Write the steps on a sheet of paper and let Beatriz work with a partner to follow them.
- Teach Beatriz study skills such as planning use of time, formulating questions to guide study, and taking notes.

## More Information on Beatriz's Scores

The sections to the left explain Beatriz's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 9.7 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 6.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 6.

Each of these sections includes one or more scores. The Stanine reports Beatriz's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Beatriz.

Jalen's ability profile is 7A. Visit [www.cogat.com](http://www.cogat.com) for more detailed information on profile 7A. Click on the "Interactive Profile Interpretation System" button. Enter 7A in the "Input Your Score Profile" section. Click "Search".

## Overview

Jalen recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Jalen's learning preferences, teachers can help him achieve greater success in school.

## Jalen's Profile of Test Scores

Jalen's scores on the three batteries do not differ significantly. All three of his scores are in the above-average range. Students with above-average reasoning scores learn relatively quickly. The following recommendations may help Jalen achieve in school:

- Encourage Jalen to discover concepts and principles rather than always providing answers. Projects that develop the student's interests can be particularly effective.
- Challenge Jalen with materials, projects, and problems that are more difficult than those used for the typical student.
- Expose Jalen to different learning or problem-solving strategies to help him understand their value for different tasks.
- When working in groups, permit Jalen to learn by explaining information, helping to summarize, and modeling higher-order thinking skills.

## More Information on Jalen's Scores

The sections to the left explain Jalen's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 8.2 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 6.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 6.

Each of these sections includes one or more scores. The Stanine reports Jalen's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Jalen.

Notes:

### Overview

Phoebe recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Phoebe's learning preferences, teachers can help her achieve greater success in school.

### More Information on Phoebe's Scores

The sections to the left explain Phoebe's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 5.10 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 6.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 6.

Each of these sections includes one or more scores. The Stanine reports Phoebe's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Phoebe.

# PROFILE NARRATIVE FOR MELITA EHRET

## Cognitive Abilities Test™ (CogAT®)

Class: VALLIERE  
 Building: Longitudinal Bldg  
 System: Training System  
 State: DM

Student: Ehret, Melita  
 Student ID: 229942  
 Form-Level: 7-12  
 Test Date: 08/2012  
 Norms: Fall 2011  
 Grade: 6

Abilities	Age Scores			APR Graph				
		Age Stanine	Age Percentile Rank	1	25	50	75	99
Verbal		9	99					◇
Quantitative		9	99					◇
Nonverbal		9	99					◇
<b>Composite (VQN)</b>		<b>9</b>	<b>99</b>					◇

### Overview

Melita recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Melita's learning preferences, teachers can help him achieve greater success in school.

### Melita's Profile of Test Scores

Melita's scores on the three batteries do not differ significantly. All three of his scores are in the very high range. The following recommendations may help Melita excel in school:

- Melita's single greatest need is for academic challenge at the level of his abilities and achievements.
- Encourage the development of Melita's academic skills. Working with an older and more experienced student or adult can be especially productive.
- Melita will benefit most from discovery learning with other students who model new ways of understanding a problem, challenge Melita's current thinking, and offer a diversity of perspectives.
- Develop Melita's understanding of how adults try to distinguish between facts and opinions when evaluating arguments.

### More Information on Melita's Scores

The sections to the left explain Melita's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 5.10 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 6.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 6.

Each of these sections includes one or more scores. The Stanine reports Melita's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Melita.

# PROFILE NARRATIVE FOR SVEN FIANTANSKO

## Cognitive Abilities Test™ (CogAT®)

Number Att. = Number Attempted

Please contact your child's teacher if you need assistance with score interpretation.

### Overview

Quennese recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Quennese's learning preferences, teachers can help her achieve greater success in school.

### Quennese's Profile of Test Scores

Quennese's scores on the three batteries do not differ significantly. All three of her scores are somewhat below average. Students who show this profile can learn effectively but often need guidance. The following steps may help Quennese learn more readily in school:

- Whenever possible, build on Quennese's interests and accomplishments.
- Reduce the number of things Quennese must attend to, remember, or do when solving problems.
- When attempting new tasks, provide Quennese with structure in the form of specific directions and guidance.
- When working in groups, pair Quennese with other students who can model the desired skills.

### More Information on Quennese's Scores

The sections to the left explain Quennese's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 8.7 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 6.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 6.

Each of these sections includes one or more scores. The Stanine reports Quennese's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Quennese.

# PROFILE NARRATIVE FOR BEE JONES

## Cognitive Abilities Test™ (CogAT®)

Class: VALLIERE  
 Building: Longitudinal Bldg  
 System: Training System  
 State: DM

Student: Jones, Bee

Nonverbal	60	60	0	1	1	3	12
<b>Composite (VQN)</b>				<b>1</b>	<b>1</b>	<b>3</b>	<b>12</b>

Notes:

Kenelm's ability profile is 1E (Q+). Visit [www.cogat.com](http://www.cogat.com) for more detailed information on profile 1E (Q+). Click on the "Interactive Profile Interpretation System" button. Enter 1E (Q+) in the "Input Your Score Profile" section. Click "Search".

## Overview

Kenelm recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Kenelm's learning preferences, teachers can help him achieve greater success in school.

## Kenelm's Profile of Test Scores

Kenelm's overall performance is in the below average range, and his Quantitative Battery score is much higher than the scores on the other batteries. He has a significant strength in quantitative (mathematical) reasoning. Whenever a student shows a particular cognitive strength, the goals for classroom instruction are

- to encourage the continued development of the strength
- to use the strength to enhance the student's development in other areas.

For example, a strength in understanding mathematical rules often indicates a similar strength in understanding rules in computer programming and sometimes in language usage as well. Discovering and then learning rules and strategies can help Kenelm develop in other areas.

## More Information on Kenelm's Scores

The sections to the left explain Kenelm's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 5.8 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 6.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 6.

Each of these sections includes one or more scores. The Stanine reports Kenelm's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Kenelm.

Dejanae's ability profile is 5A. Visit [www.cogat.com](http://www.cogat.com) for more detailed information on profile 5A. Click on the "Interactive Profile Interpretation System" button. Enter 5A in the "Input Your Score Profile" section. Click "Search".

Number Att. = Number Attempted

Please contact your child's teacher if you need assistance with score interpretation.

## Overview

Dejanae recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Dejanae's learning preferences, teachers can help her achieve greater success in school.

## Dejanae's Profile of Test Scores

Dejanae's scores on the three batteries do not differ significantly. All three of her scores are in the range typically observed in students of this age. For students who have reasoning scores in the average range, the following steps may be helpful:

- Build on Dejanae's strengths by encouraging academic accomplishments in areas that interest her.
- Point out how new skills and information build on knowledge and skills Dejanae already has.
- Show Dejanae how to break complex tasks into simpler steps. Model the steps as you explain them. Write the steps on a sheet of paper and let Dejanae work with a partner to follow them.
- Teach Dejanae study skills such as planning use of time, formulating questions to guide study, and taking notes.

## More Information on Dejanae's Scores

The sections to the left explain Dejanae's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 9.9 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 6.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 6.

Each of these sections includes one or more scores. The Stanine reports Dejanae's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Dejanae.

## Overview

Marissa recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Marissa's learning preferences, teachers can help her achieve greater success in school.

## Marissa's Profile of Test Scores

Marissa's scores on the three batteries do not differ significantly. All three of her scores are in the very high range. The following recommendations may help Marissa excel in school:

- Marissa's single greatest need is for academic challenge at the level of her abilities and achievements.
- Encourage the development of Marissa's academic skills. Working with an older and more experienced student or adult can be especially productive.
- Marissa will benefit most from discovery learning with other students who model new ways of understanding a problem, challenge Marissa's current thinking, and offer a diversity of perspectives.
- Develop Marissa's understanding of how adults try to distinguish between facts and opinions when evaluating arguments.

## More Information on Marissa's Scores

The sections to the left explain Marissa's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 8.1 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 6.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 6.

Each of these sections includes one or more scores. The Stanine reports Marissa's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Marissa.

# PROFILE NARRATIVE FOR AGGIE SUMMY

Nonverbal	60	60	0	1	1	3	12
<b>Composite (VQN)</b>				<b>1</b>	<b>1</b>	<b>3</b>	<b>12</b>

Notes:

Joel's ability profile is 1A. Visit [www.cogat.com](http://www.cogat.com) for more detailed information on profile 1A. Click on the "Interactive Profile Interpretation System" button. Enter 1A in the "Input Your Score Profile" section. Click "Search".

### Overview

Joel recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Joel's learning preferences, teachers can help him achieve greater success in school.

### Joel's Profile of Test Scores

Joel's scores on the three batteries do not differ significantly. All three of his scores are somewhat below average. Students who show this profile can learn effectively but often need guidance. The following steps may help Joel learn more readily in school:

- Whenever possible, build on Joel's interests and accomplishments.
- Reduce the number of things Joel must attend to, remember, or do when solving problems.
- When attempting new tasks, provide Joel with structure in the form of specific directions and guidance.
- When working in groups, pair Joel with other students who can model the desired skills.

### More Information on Joel's Scores

The sections to the left explain Joel's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 9.0 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 6.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 6.

Each of these sections includes one or more scores. The Stanine reports Joel's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Joel.

## Overview

Sophia recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Sophia's learning preferences, teachers can help her achieve greater success in school.

## Sophia's Profile of Test Scores

Sophia's scores on the three batteries do not differ significantly. All three of her scores are in the above-average range. Students with above-average reasoning scores learn relatively quickly. The following recommendations may help Sophia achieve in school:

- Encourage Sophia to discover concepts and principles rather than always providing answers. Projects that develop the student's interests can be particularly effective.
- Challenge Sophia with materials, projects, and problems that are more difficult than those used for the typical student.
- Expose Sophia to different learning or problem-solving strategies to help her understand their value for different tasks.
- When working in groups, permit Sophia to learn by explaining information, helping to summarize, and modeling higher-order thinking skills.

## More Information on Sophia's Scores

The sections to the left explain Sophia's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 8.1 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 7.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 7.

Each of these sections includes one or more scores. The Stanine reports Sophia's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Sophia.

Notes:

Alyanna's ability profile is 1A. Visit [www.cogat.com](http://www.cogat.com) for more detailed information on profile 1A. Click on the "Interactive Profile Interpretation System" button. Enter 1A in the "Input Your Score Profile" section. Click "Search".

Number Att. = Number Attempted

Please contact your child's teacher if you need assistance with score interpretation.

### Overview

Alyanna recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Alyanna's learning preferences, teachers can help her achieve greater success in school.

### Alyanna's Profile of Test Scores

Alyanna's scores on the three batteries do not differ significantly. All three of her scores are somewhat below average. Students who show this profile can learn effectively but often need guidance. The following steps may help Alyanna learn more readily in school:

- Whenever possible, build on Alyanna's interests and accomplishments.
- Reduce the number of things Alyanna must attend to, remember, or do when solving problems.
- When attempting new tasks, provide Alyanna with structure in the form of specific directions and guidance.
- When working in groups, pair Alyanna with other students who can model the desired skills.

### More Information on Alyanna's Scores

The sections to the left explain Alyanna's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 8.7 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 7.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 7.

Each of these sections includes one or more scores. The Stanine reports Alyanna's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Alyanna.

Notes:

Kyle's ability profile is 8A. Visit [www.cogat.com](http://www.cogat.com) for more detailed information on profile 8A. Click on the "Interactive Profile Interpretation System" button. Enter 8A in the "Input Your Score Profile" section. Click "Search".

## Overview

Kyle recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Kyle's learning preferences, teachers can help him achieve greater success in school.

## Kyle's Profile of Test Scores

Kyle's scores on the three batteries do not differ significantly. All three of his scores are in the above-average range. Students with above-average reasoning scores learn relatively quickly. The following recommendations may help Kyle achieve in school:

- Encourage Kyle to discover concepts and principles rather than always providing answers. Projects that develop the student's interests can be particularly effective.
- Challenge Kyle with materials, projects, and problems that are more difficult than those used for the typical student.
- Expose Kyle to different learning or problem-solving strategies to help him understand their value for different tasks.
- When working in groups, permit Kyle to learn by explaining information, helping to summarize, and modeling higher-order thinking skills.

## More Information on Kyle's Scores

The sections to the left explain Kyle's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 8.0 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 7.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 7.

Each of these sections includes one or more scores. The Stanine reports Kyle's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Kyle.

### Overview

Samuel recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Samuel's learning preferences, teachers can help him achieve greater success in school.

### Samuel's Profile of Test Scores

Samuel's scores on the three batteries do not differ significantly. All three of his scores are in the very high range. The following recommendations may help Samuel excel in school:

- Samuel's single greatest need is for academic challenge at the level of his abilities and achievements.
- Encourage the development of Samuel's academic skills. Working with an older and more experienced student or adult can be especially productive.
- Samuel will benefit most from discovery learning with other students who model new ways of understanding a problem, challenge Samuel's current thinking, and offer a diversity of perspectives.
- Develop Samuel's understanding of how adults try to distinguish between facts and opinions when evaluating arguments.

### More Information on Samuel's Scores

The sections to the left explain Samuel's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 9.5 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 7.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 7.

Each of these sections includes one or more scores. The Stanine reports Samuel's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Samuel.

### Overview

Cameron recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Cameron's learning preferences, teachers can help him achieve greater success in school.

### Cameron's Profile of Test Scores

Cameron's scores on the three batteries do not differ significantly. All three of his scores are somewhat below average. Students who show this profile can learn effectively but often need guidance. The following steps may help Cameron learn more readily in school:

- Whenever possible, build on Cameron's interests and accomplishments.
- Reduce the number of things Cameron must attend to, remember, or do when solving problems.
- When attempting new tasks, provide Cameron with structure in the form of specific directions and guidance.
- When working in groups, pair Cameron with other students who can model the desired skills.

### More Information on Cameron's Scores

The sections to the left explain Cameron's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 8.1 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 7.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 7.

Each of these sections includes one or more scores. The Stanine reports Cameron's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Cameron.

## Overview

Madeline recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Madeline's learning preferences, teachers can help her achieve greater success in school.

## Madeline's Profile of Test Scores

Madeline's scores on the three batteries do not differ significantly. All three of her scores are in the very high range. The following recommendations may help Madeline excel in school:

- Madeline's single greatest need is for academic challenge at the level of her abilities and achievements.
- Encourage the development of Madeline's academic skills. Working with an older and more experienced student or adult can be especially productive.
- Madeline will benefit most from discovery learning with other students who model new ways of understanding a problem, challenge Madeline's current thinking, and offer a diversity of perspectives.
- Develop Madeline's understanding of how adults try to distinguish between facts and opinions when evaluating arguments.

## More Information on Madeline's Scores

The sections to the left explain Madeline's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 8.0 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 7.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 7.

Each of these sections includes one or more scores. The Stanine reports Madeline's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Madeline.

### Overview

Jason recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Jason's learning preferences, teachers can help him achieve greater success in school.

### Jason's Profile of Test Scores

Jason's scores on the three batteries do not differ significantly. All three of his scores are in the very high range. The following recommendations may help Jason excel in school:

- Jason's single greatest need is for academic challenge at the level of his abilities and achievements.
- Encourage the development of Jason's academic skills. Working with an older and more experienced student or adult can be especially productive.
- Jason will benefit most from discovery learning with other students who model new ways of understanding a problem, challenge Jason's current thinking, and offer a diversity of perspectives.
- Develop Jason's understanding of how adults try to distinguish between facts and opinions when evaluating arguments.

### More Information on Jason's Scores

The sections to the left explain Jason's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 9.0 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 8.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 8.

Each of these sections includes one or more scores. The Stanine reports Jason's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Jason.

## Overview

Jaiden recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Jaiden's learning preferences, teachers can help her achieve greater success in school.

## Jaiden's Profile of Test Scores

Jaiden's scores on the three batteries do not differ significantly. All three of her scores are in the range typically observed in students of this age. For students who have reasoning scores in the average range, the following steps may be helpful:

- Build on Jaiden's strengths by encouraging academic accomplishments in areas that interest her.
- Point out how new skills and information build on knowledge and skills Jaiden already has.
- Show Jaiden how to break complex tasks into simpler steps. Model the steps as you explain them. Write the steps on a sheet of paper and let Jaiden work with a partner to follow them.
- Teach Jaiden study skills such as planning use of time, formulating questions to guide study, and taking notes.

## More Information on Jaiden's Scores

The sections to the left explain Jaiden's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 9.10 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 8.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 8.

Each of these sections includes one or more scores. The Stanine reports Jaiden's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Jaiden.

# PROFILE NARRATIVE FOR PATRICK DOWNING

## Overview

Grace recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Grace's learning preferences, teachers can help her achieve greater success in school.

## Grace's Profile of Test Scores

Grace's scores on the three batteries do not differ significantly. All three of her scores are in the very high range. The following recommendations may help Grace excel in school:

- Grace's single greatest need is for academic challenge at the level of her abilities and achievements.
- Encourage the development of Grace's academic skills. Working with an older and more experienced student or adult can be especially productive.
- Grace will benefit most from discovery learning with other students who model new ways of understanding a problem, challenge Grace's current thinking, and offer a diversity of perspectives.
- Develop Grace's understanding of how adults try to distinguish between facts and opinions when evaluating arguments.

## More Information on Grace's Scores

The sections to the left explain Grace's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 9.2 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 8.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 8.

Each of these sections includes one or more scores. The Stanine reports Grace's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Grace.

## Overview

Cody recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Cody's learning preferences, teachers can help him achieve greater success in school.

## Cody's Profile of Test Scores

Cody's scores on the three batteries do not differ significantly. All three of his scores are in the range typically observed in students of this age. For students who have reasoning scores in the average range, the following steps may be helpful:

- Build on Cody's strengths by encouraging academic accomplishments in areas that interest him.
- Point out how new skills and information build on knowledge and skills Cody already has.
- Show Cody how to break complex tasks into simpler steps. Model the steps as you explain them. Write the steps on a sheet of paper and let Cody work with a partner to follow them.
- Teach Cody study skills such as planning use of time, formulating questions to guide study, and taking notes.

## More Information on Cody's Scores

The sections to the left explain Cody's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 9.10 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 8.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 8.

Each of these sections includes one or more scores. The Stanine reports Cody's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Cody.

### Overview

Gabriell recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Gabriell's learning preferences, teachers can help him achieve greater success in school.

### Gabriell's Profile of Test Scores

Gabriell's scores on the three batteries do not differ significantly. All three of his scores are somewhat below average. Students who show this profile can learn effectively but often need guidance. The following steps may help Gabriell learn more readily in school:

- Whenever possible, build on Gabriell's interests and accomplishments.
- Reduce the number of things Gabriell must attend to, remember, or do when solving problems.
- When attempting new tasks, provide Gabriell with structure in the form of specific directions and guidance.
- When working in groups, pair Gabriell with other students who can model the desired skills.

### More Information on Gabriell's Scores

The sections to the left explain Gabriell's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 9.4 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 8.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 8.

Each of these sections includes one or more scores. The Stanine reports Gabriell's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Gabriell.

Notes:

Emily's ability profile is 1A. Visit [www.cogat.com](http://www.cogat.com) for more detailed information on profile 1A. Click on the "Interactive Profile Interpretation System" button. Enter 1A in the "Input Your Score Profile" section. Click "Search".

### Overview

Emily recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Emily's learning preferences, teachers can help her achieve greater success in school.

### Emily's Profile of Test Scores

Emily's scores on the three batteries do not differ significantly. All three of her scores are somewhat below average. Students who show this profile can learn effectively but often need guidance. The following steps may help Emily learn more readily in school:

- Whenever possible, build on Emily's interests and accomplishments.
- Reduce the number of things Emily must attend to, remember, or do when solving problems.
- When attempting new tasks, provide Emily with structure in the form of specific directions and guidance.
- When working in groups, pair Emily with other students who can model the desired skills.

### More Information on Emily's Scores

The sections to the left explain Emily's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 10.3 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 9.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 9.

Each of these sections includes one or more scores. The Stanine reports Emily's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Emily.

# PROFILE NARRATIVE FOR JOSEBA CALLEJON

## Cognitive Abilities Test™ (CogAT®)

Class: FRESHMEN  
 Building: Longitudinal Bldg  
 System: Training System  
 State: DM

Student: Callejon, Joseba  
 Student ID: 9470111404  
 Form-Level: 7-15/16  
 Test Date: 08/2012  
 Norms: Fall 2011  
 Grade: 9

Abilities	Age Scores			APR Graph				
		Age Stanine	Age Percentile Rank	1	25	50	75	99
Verbal		9	99					◇
Quantitative		9	99					◇
Nonverbal		9	99					◇

<b>Composite (VQN)</b>				<b>9</b>	<b>99</b>	<b>6</b>	<b>75</b>

Notes:

Joseba's ability profile is 9A. Visit [www.cogat.com](http://www.cogat.com) for more detailed information on profile 9A. Click on the "Interactive Profile Interpretation System" button. Enter 9A in the "Input Your Score Profile" section. Click "Search".

### Overview

Joseba recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Joseba's learning preferences, teachers can help her achieve greater success in school.

### Joseba's Profile of Test Scores

Joseba's scores on the three batteries do not differ significantly. All three of her scores are in the very high range. The following recommendations may help Joseba excel in school:

- Joseba's single greatest need is for academic challenge at the level of her abilities and achievements.
- Encourage the development of Joseba's academic skills. Working with an older and more experienced student or adult can be especially productive.
- Joseba will benefit most from discovery learning with other students who model new ways of understanding a problem, challenge Joseba's current thinking, and offer a diversity of perspectives.
- Develop Joseba's understanding of how adults try to distinguish between facts and opinions when evaluating arguments.

### More Information on Joseba's Scores

The sections to the left explain Joseba's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 10.11 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 9.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 9.

Each of these sections includes one or more scores. The Stanine reports Joseba's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Joseba.

Notes:

Sariah's ability profile is 6A. Visit [www.cogat.com](http://www.cogat.com) for more detailed information on profile 6A. Click on the "Interactive Profile Interpretation System" button. Enter 6A in the "Input Your Score Profile" section. Click "Search".

Number Att. = Number Attempted

Please contact your child's teacher if you need assistance with score interpretation.

## Overview

Sariah recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Sariah's learning preferences, teachers can help her achieve greater success in school.

## Sariah's Profile of Test Scores

Sariah's scores on the three batteries do not differ significantly. All three of her scores are in the range typically observed in students of this age. For students who have reasoning scores in the average range, the following steps may be helpful:

- Build on Sariah's strengths by encouraging academic accomplishments in areas that interest her.
- Point out how new skills and information build on knowledge and skills Sariah already has.
- Show Sariah how to break complex tasks into simpler steps. Model the steps as you explain them. Write the steps on a sheet of paper and let Sariah work with a partner to follow them.
- Teach Sariah study skills such as planning use of time, formulating questions to guide study, and taking notes.

## More Information on Sariah's Scores

The sections to the left explain Sariah's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 10.4 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 9.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 9.

Each of these sections includes one or more scores. The Stanine reports Sariah's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Sariah.

Number Att. = Number Attempted

Please contact your child's teacher if you need assistance with score interpretation.

## Overview

Maeve recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Maeve's learning preferences, teachers can help her achieve greater success in school.

## Maeve's Profile of Test Scores

Maeve's scores on the three batteries do not differ significantly. All three of her scores are in the very high range. The following recommendations may help Maeve excel in school:

- Maeve's single greatest need is for academic challenge at the level of her abilities and achievements.
- Encourage the development of Maeve's academic skills. Working with an older and more experienced student or adult can be especially productive.
- Maeve will benefit most from discovery learning with other students who model new ways of understanding a problem, challenge Maeve's current thinking, and offer a diversity of perspectives.
- Develop Maeve's understanding of how adults try to distinguish between facts and opinions when evaluating arguments.

## More Information on Maeve's Scores

The sections to the left explain Maeve's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 10.4 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 9.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 9.

Each of these sections includes one or more scores. The Stanine reports Maeve's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Maeve.

Please contact your child's teacher if you need assistance with score interpretation.

## Overview

Mackenzi recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Mackenzi's learning preferences, teachers can help her achieve greater success in school.

## Mackenzi's Profile of Test Scores

Mackenzi's scores on the three batteries do not differ significantly. All three of her scores are in the range typically observed in students of this age. For students who have reasoning scores in the average range, the following steps may be helpful:

- Build on Mackenzi's strengths by encouraging academic accomplishments in areas that interest her.
- Point out how new skills and information build on knowledge and skills Mackenzi already has.
- Show Mackenzi how to break complex tasks into simpler steps. Model the steps as you explain them. Write the steps on a sheet of paper and let Mackenzi work with a partner to follow them.
- Teach Mackenzi study skills such as planning use of time, formulating questions to guide study, and taking notes.

## More Information on Mackenzi's Scores

The sections to the left explain Mackenzi's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 10.5 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 9.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 9.

Each of these sections includes one or more scores. The Stanine reports Mackenzi's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Mackenzi.

## Overview

Emma recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Emma's learning preferences, teachers can help her achieve greater success in school.

## Emma's Profile of Test Scores

Emma's scores on the three batteries do not differ significantly. All three of her scores are in the range typically observed in students of this age. For students who have reasoning scores in the average range, the following steps may be helpful:

- Build on Emma's strengths by encouraging academic accomplishments in areas that interest her.
- Point out how new skills and information build on knowledge and skills Emma already has.
- Show Emma how to break complex tasks into simpler steps. Model the steps as you explain them. Write the steps on a sheet of paper and let Emma work with a partner to follow them.
- Teach Emma study skills such as planning use of time, formulating questions to guide study, and taking notes.

## More Information on Emma's Scores

The sections to the left explain Emma's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 10.5 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 9.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 9.

Each of these sections includes one or more scores. The Stanine reports Emma's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Emma.

## Overview

Tarah recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Tarah's learning preferences, teachers can help her achieve greater success in school.

## Tarah's Profile of Test Scores

Tarah's scores on the three batteries do not differ significantly. All three of her scores are in the very high range. The following recommendations may help Tarah excel in school:

- Tarah's single greatest need is for academic challenge at the level of her abilities and achievements.
- Encourage the development of Tarah's academic skills. Working with an older and more experienced student or adult can be especially productive.
- Tarah will benefit most from discovery learning with other students who model new ways of understanding a problem, challenge Tarah's current thinking, and offer a diversity of perspectives.
- Develop Tarah's understanding of how adults try to distinguish between facts and opinions when evaluating arguments.

## More Information on Tarah's Scores

The sections to the left explain Tarah's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 10.8 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 9.

Notes:

Luke's ability profile is 5A. Visit [www.cogat.com](http://www.cogat.com) for more detailed information on profile 5A. Click on the "Interactive Profile Interpretation System" button. Enter 5A in the "Input Your Score Profile" section. Click "Search".

## Overview

Luke recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Luke's learning preferences, teachers can help him achieve greater success in school.

## Luke's Profile of Test Scores

Luke's scores on the three batteries do not differ significantly. All three of his scores are in the range typically observed in students of this age. For students who have reasoning scores in the average range, the following steps may be helpful:

- Build on Luke's strengths by encouraging academic accomplishments in areas that interest him.
- Point out how new skills and information build on knowledge and skills Luke already has.
- Show Luke how to break complex tasks into simpler steps. Model the steps as you explain them. Write the steps on a sheet of paper and let Luke work with a partner to follow them.
- Teach Luke study skills such as planning use of time, formulating questions to guide study, and taking notes.

## More Information on Luke's Scores

The sections to the left explain Luke's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 11.6 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 10.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 10.

Each of these sections includes one or more scores. The Stanine reports Luke's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Luke.

### Overview

Wyatt recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Wyatt's learning preferences, teachers can help him achieve greater success in school.

### Wyatt's Profile of Test Scores

Wyatt's scores on the three batteries do not differ significantly. All three of his scores are in the very high range. The following recommendations may help Wyatt excel in school:

- Wyatt's single greatest need is for academic challenge at the level of his abilities and achievements.
- Encourage the development of Wyatt's academic skills. Working with an older and more experienced student or adult can be especially productive.
- Wyatt will benefit most from discovery learning with other students who model new ways of understanding a problem, challenge Wyatt's current thinking, and offer a diversity of perspectives.
- Develop Wyatt's understanding of how adults try to distinguish between facts and opinions when evaluating arguments.

### More Information on Wyatt's Scores

The sections to the left explain Wyatt's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 11.7 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 10.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 10.

Each of these sections includes one or more scores. The Stanine reports Wyatt's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Wyatt.

Please contact your child's teacher if you need assistance with score interpretation.

### Overview

Shamus recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Shamus' learning preferences, teachers can help him achieve greater success in school.

### Shamus' Profile of Test Scores

Shamus' scores on the three batteries do not differ significantly. All three of his scores are somewhat below average. Students who show this profile can learn effectively but often need guidance. The following steps may help Shamus learn more readily in school:

- Whenever possible, build on Shamus' interests and accomplishments.
- Reduce the number of things Shamus must attend to, remember, or do when solving problems.
- When attempting new tasks, provide Shamus with structure in the form of specific directions and guidance.
- When working in groups, pair Shamus with other students who can model the desired skills.

### More Information on Shamus' Scores

The sections to the left explain Shamus' performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 11.10 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 10.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 10.

Each of these sections includes one or more scores. The Stanine reports Shamus' performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Shamus.

### Overview

Lane recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Lane's learning preferences, teachers can help her achieve greater success in school.

### Lane's Profile of Test Scores

Lane's scores on the three batteries do not differ significantly. All three of her scores are in the very high range. The following recommendations may help Lane excel in school:

- Lane's single greatest need is for academic challenge at the level of her abilities and achievements.
- Encourage the development of Lane's academic skills. Working with an older and more experienced student or adult can be especially productive.
- Lane will benefit most from discovery learning with other students who model new ways of understanding a problem, challenge Lane's current thinking, and offer a diversity of perspectives.
- Develop Lane's understanding of how adults try to distinguish between facts and opinions when evaluating arguments.

### More Information on Lane's Scores

The sections to the left explain Lane's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 10.9 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 10.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 10.

Each of these sections includes one or more scores. The Stanine reports Lane's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Lane.

## Overview

Amalia recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Amalia's learning preferences, teachers can help her achieve greater success in school.

## Amalia's Profile of Test Scores

Amalia's scores on the three batteries do not differ significantly. All three of her scores are in the range typically observed in students of this age. For students who have reasoning scores in the average range, the following steps may be helpful:

- Build on Amalia's strengths by encouraging academic accomplishments in areas that interest her.
- Point out how new skills and information build on knowledge and skills Amalia already has.
- Show Amalia how to break complex tasks into simpler steps. Model the steps as you explain them. Write the steps on a sheet of paper and let Amalia work with a partner to follow them.
- Teach Amalia study skills such as planning use of time, formulating questions to guide study, and taking notes.

## More Information on Amalia's Scores

The sections to the left explain Amalia's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 10.8 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 10.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 10.

Each of these sections includes one or more scores. The Stanine reports Amalia's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Amalia.

### Overview

Christia recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Christia's learning preferences, teachers can help him achieve greater success in school.

### Christia's Profile of Test Scores

Christia's scores on the three batteries do not differ significantly. All three of his scores are somewhat below average. Students who show this profile can learn effectively but often need guidance. The following steps may help Christia learn more readily in school:

- Whenever possible, build on Christia's interests and accomplishments.
- Reduce the number of things Christia must attend to, remember, or do when solving problems.
- When attempting new tasks, provide Christia with structure in the form of specific directions and guidance.
- When working in groups, pair Christia with other students who can model the desired skills.

### More Information on Christia's Scores

The sections to the left explain Christia's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 10.4 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 10.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 10.

Each of these sections includes one or more scores. The Stanine reports Christia's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Christia.

- Alexia's single greatest need is for academic challenge at the level of her abilities and achievements.
- Encourage the development of Alexia's academic skills. Working with an older and more experienced student or adult can be especially productive.
- Alexia will benefit most from discovery learning with other students who model new ways of understanding a problem, challenge Alexia's current thinking, and offer a diversity of perspectives.
- Develop Alexia's understanding of how adults try to distinguish between facts and opinions when evaluating arguments.

### More Information on Alexia's Scores

The sections to the left explain Alexia's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 11.11 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 11.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 11.

Each of these sections includes one or more scores. The Stanine reports Alexia's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Alexia.

# PROFILE NARRATIVE FOR CIENNA BLANCO

## Cognitive Abilities Test™ (CogAT®)

Notes:

Cienna's ability profile is 1A. Visit [www.cogat.com](http://www.cogat.com) for more detailed information on profile 1A. Click on the "Interactive Profile Interpretation System" button. Enter 1A in the "Input Your Score Profile" section. Click "Search".

### Overview

Cienna recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Cienna's learning preferences, teachers can help her achieve greater success in school.

### Cienna's Profile of Test Scores

Cienna's scores on the three batteries do not differ significantly. All three of her scores are somewhat below average. Students who show this profile can learn effectively but often need guidance. The following steps may help Cienna learn more readily in school:

- Whenever possible, build on Cienna's interests and accomplishments.
- Reduce the number of things Cienna must attend to, remember, or do when solving problems.
- When attempting new tasks, provide Cienna with structure in the form of specific directions and guidance.
- When working in groups, pair Cienna with other students who can model the desired skills.

### More Information on Cienna's Scores

The sections to the left explain Cienna's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 11.9 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 11.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 11.

Each of these sections includes one or more scores. The Stanine reports Cienna's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Cienna.

## Overview

Jesse recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Jesse's learning preferences, teachers can help him achieve greater success in school.

## Jesse's Profile of Test Scores

Jesse's scores on the three batteries do not differ significantly. All three of his scores are in the range typically observed in students of this age. For students who have reasoning scores in the average range, the following steps may be helpful:

- Build on Jesse's strengths by encouraging academic accomplishments in areas that interest him.
- Point out how new skills and information build on knowledge and skills Jesse already has.
- Show Jesse how to break complex tasks into simpler steps. Model the steps as you explain them. Write the steps on a sheet of paper and let Jesse work with a partner to follow them.
- Teach Jesse study skills such as planning use of time, formulating questions to guide study, and taking notes.

## More Information on Jesse's Scores

The sections to the left explain Jesse's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 12.4 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 11.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 11.

Each of these sections includes one or more scores. The Stanine reports Jesse's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Jesse.

- Encourage the development of Jesse's academic skills. Working with an older and more experienced student or adult can be especially productive.
- Jesse will benefit most from discovery learning with other students who model new ways of understanding a problem, challenge Jesse's current thinking, and offer a diversity of perspectives.
- Develop Jesse's understanding of how adults try to distinguish between facts and opinions when evaluating arguments.

### More Information on Jesse's Scores

The sections to the left explain Jesse's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 11.7 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 11.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 11.

Each of these sections includes one or more scores. The Stanine reports Jesse's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Jesse.

## Overview

Sopie recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Sopie's learning preferences, teachers can help her achieve greater success in school.

## Sopie's Profile of Test Scores

Sopie's scores on the three batteries do not differ significantly. All three of her scores are in the range typically observed in students of this age. For students who have reasoning scores in the average range, the following steps may be helpful:

- Build on Sopie's strengths by encouraging academic accomplishments in areas that interest her.
- Point out how new skills and information build on knowledge and skills Sopie already has.
- Show Sopie how to break complex tasks into simpler steps. Model the steps as you explain them. Write the steps on a sheet of paper and let Sopie work with a partner to follow them.
- Teach Sopie study skills such as planning use of time, formulating questions to guide study, and taking notes.

## More Information on Sopie's Scores

The sections to the left explain Sopie's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 11.11 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 11.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 11.

Each of these sections includes one or more scores. The Stanine reports Sopie's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Sopie.

## Overview

Xavier recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Xavier's learning preferences, teachers can help him achieve greater success in school.

## Xavier's Profile of Test Scores

Xavier's scores on the three batteries do not differ significantly. All three of his scores are somewhat below average. Students who show this profile can learn effectively but often need guidance. The following steps may help Xavier learn more readily in school:

- Whenever possible, build on Xavier's interests and accomplishments.
- Reduce the number of things Xavier must attend to, remember, or do when solving problems.
- When attempting new tasks, provide Xavier with structure in the form of specific directions and guidance.
- When working in groups, pair Xavier with other students who can model the desired skills.

## More Information on Xavier's Scores

The sections to the left explain Xavier's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 11.10 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 11.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 11.

Each of these sections includes one or more scores. The Stanine reports Xavier's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Xavier.

Notes:

### Overview

Xavier recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Xavier's learning preferences, teachers can help him achieve greater success in school.

### More Information on Xavier's Scores

The sections to the left explain Xavier's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 13.4 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 11.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 11.

Each of these sections includes one or more scores. The Stanine reports Xavier's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Xavier.

## Overview

Cole recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Cole's learning preferences, teachers can help her achieve greater success in school.

## Cole's Profile of Test Scores

Cole's scores on the three batteries do not differ significantly. All three of her scores are in the very high range. The following recommendations may help Cole excel in school:

- Cole's single greatest need is for academic challenge at the level of her abilities and achievements.
- Encourage the development of Cole's academic skills. Working with an older and more experienced student or adult can be especially productive.
- Cole will benefit most from discovery learning with other students who model new ways of understanding a problem, challenge Cole's current thinking, and offer a diversity of perspectives.
- Develop Cole's understanding of how adults try to distinguish between facts and opinions when evaluating arguments.

## More Information on Cole's Scores

The sections to the left explain Cole's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 12.3 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 12.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 12.

Each of these sections includes one or more scores. The Stanine reports Cole's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Cole.

## Overview

Cameron recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Cameron's learning preferences, teachers can help him achieve greater success in school.

## Cameron's Profile of Test Scores

Cameron's scores on the three batteries do not differ significantly. All three of his scores are in the range typically observed in students of this age. For students who have reasoning scores in the average range, the following steps may be helpful:

- Build on Cameron's strengths by encouraging academic accomplishments in areas that interest him.
- Point out how new skills and information build on knowledge and skills Cameron already has.
- Show Cameron how to break complex tasks into simpler steps. Model the steps as you explain them. Write the steps on a sheet of paper and let Cameron work with a partner to follow them.
- Teach Cameron study skills such as planning use of time, formulating questions to guide study, and taking notes.

## More Information on Cameron's Scores

The sections to the left explain Cameron's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 12.0 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 12.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 12.

Each of these sections includes one or more scores. The Stanine reports Cameron's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Cameron.

Caitlyn's ability profile is 1A. Visit [www.cogat.com](http://www.cogat.com) for more detailed information on profile 1A. Click on the "Interactive Profile Interpretation System" button. Enter 1A in the "Input Your Score Profile" section. Click "Search".

## Overview

Caitlyn recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Caitlyn's learning preferences, teachers can help her achieve greater success in school.

## Caitlyn's Profile of Test Scores

Caitlyn's scores on the three batteries do not differ significantly. All three of her scores are somewhat below average. Students who show this profile can learn effectively but often need guidance. The following steps may help Caitlyn learn more readily in school:

- Whenever possible, build on Caitlyn's interests and accomplishments.
- Reduce the number of things Caitlyn must attend to, remember, or do when solving problems.
- When attempting new tasks, provide Caitlyn with structure in the form of specific directions and guidance.
- When working in groups, pair Caitlyn with other students who can model the desired skills.

## More Information on Caitlyn's Scores

The sections to the left explain Caitlyn's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 13.7 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 12.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 12.

Each of these sections includes one or more scores. The Stanine reports Caitlyn's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Caitlyn.

### Overview

Kelly recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Kelly's learning preferences, teachers can help her achieve greater success in school.

### Kelly's Profile of Test Scores

Kelly's scores on the three batteries do not differ significantly. All three of her scores are somewhat below average. Students who show this profile can learn effectively but often need guidance. The following steps may help Kelly learn more readily in school:

- Whenever possible, build on Kelly's interests and accomplishments.
- Reduce the number of things Kelly must attend to, remember, or do when solving problems.
- When attempting new tasks, provide Kelly with structure in the form of specific directions and guidance.
- When working in groups, pair Kelly with other students who can model the desired skills.

### More Information on Kelly's Scores

The sections to the left explain Kelly's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 13.5 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 12.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 12.

Each of these sections includes one or more scores. The Stanine reports Kelly's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Kelly.

### Overview

Leigh recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Leigh's learning preferences, teachers can help her achieve greater success in school.

### Leigh's Profile of Test Scores

Leigh's scores on the three batteries do not differ significantly. All three of her scores are in the very high range. The following recommendations may help Leigh excel in school:

- Leigh's single greatest need is for academic challenge at the level of her abilities and achievements.
- Encourage the development of Leigh's academic skills. Working with an older and more experienced student or adult can be especially productive.
- Leigh will benefit most from discovery learning with other students who model new ways of understanding a problem, challenge Leigh's current thinking, and offer a diversity of perspectives.
- Develop Leigh's understanding of how adults try to distinguish between facts and opinions when evaluating arguments.

### More Information on Leigh's Scores

The sections to the left explain Leigh's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 13.5 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 12.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 12.

Each of these sections includes one or more scores. The Stanine reports Leigh's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Leigh.

Notes:

### Overview

Dominiqu recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Dominiqu's learning preferences, teachers can help her achieve greater success in school.

### More Information on Dominiqu's Scores

The sections to the left explain Dominiqu's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 13.7 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 12.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 12.

Each of these sections includes one or more scores. The Stanine reports Dominiqu's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Dominiqu.

Abilities	Age Scores			APR Graph				
		Age Stanine	Age Percentile Rank	1	25	50	75	99

Ian's ability profile is 4A. Visit [www.cogat.com](http://www.cogat.com) for more detailed information on profile 4A. Click on the "Interactive Profile Interpretation System" button. Enter 4A in the "Input Your Score Profile" section. Click "Search".

## Overview

Ian recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Ian's learning preferences, teachers can help him achieve greater success in school.

## Ian's Profile of Test Scores

Ian's scores on the three batteries do not differ significantly. All three of his scores are in the range typically observed in students of this age. For students who have reasoning scores in the average range, the following steps may be helpful:

- Build on Ian's strengths by encouraging academic accomplishments in areas that interest him.
- Point out how new skills and information build on knowledge and skills Ian already has.
- Show Ian how to break complex tasks into simpler steps. Model the steps as you explain them. Write the steps on a sheet of paper and let Ian work with a partner to follow them.
- Teach Ian study skills such as planning use of time, formulating questions to guide study, and taking notes.

## More Information on Ian's Scores

The sections to the left explain Ian's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 13.1 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 12.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 12.

Each of these sections includes one or more scores. The Stanine reports Ian's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Ian.

Sara's ability profile is 1A. Visit [www.cogat.com](http://www.cogat.com) for more detailed information on profile 1A. Click on the "Interactive Profile Interpretation System" button. Enter 1A in the "Input Your Score Profile" section. Click "Search".

### Overview

Sara recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Sara's learning preferences, teachers can help her achieve greater success in school.

### Sara's Profile of Test Scores

Sara's scores on the three batteries do not differ significantly. All three of her scores are somewhat below average. Students who show this profile can learn effectively but often need guidance. The following steps may help Sara learn more readily in school:

- Whenever possible, build on Sara's interests and accomplishments.
- Reduce the number of things Sara must attend to, remember, or do when solving problems.
- When attempting new tasks, provide Sara with structure in the form of specific directions and guidance.
- When working in groups, pair Sara with other students who can model the desired skills.

### More Information on Sara's Scores

The sections to the left explain Sara's performance using different types of comparisons and score scales.

- The Age Scores section compares her performance to students across the nation who are also 14.2 years old.
- The Grade Scores section compares her performance to students across the nation who are also in grade 12.
- The Local Scores section compares her age score performance to students in your local area who are also in grade 12.

Each of these sections includes one or more scores. The Stanine reports Sara's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Sara.
